ASP.NET (/mikebosch/Tags/ASP.NET)   **MVC (/mikebosch/Tags/MVC)**

It looks like people are starting to deploy sites based on the ASP.NET MVC Framework already. I've been trying to collect some examples and here's what I got so far.

- WorkGrabber.com - Find Local Contractors (http://workgrabber.com/) - Nice site for finding local contractors and getting quotes / bids for your projects
- BumBunnies.com (http://www.bumbunnies.com/) - Apparently, this is the website for the popular iPhone sexy gallery application. **WARNING!!! MIGHT NOT BE SAFE FOR WORK.**
- Kigg (http://kigg.dotnetslackers.com/) - Kigg is a Digg like application developed with ASP.NET MVC
- RowTube.net (http://www.rowtube.net/) - RowTube is a place to view the latest rowing videos.
- Shinyzhu.com (http://shinyzhu.com/) - ShinyPortal is a mini portal created by ASP.NET MVC Preview 2.
- Yonkly.com (http://yonkly.com/timeline) - Twitter clone done in ASP.NET MVC.
- Jobtree.com.au (http://www.jobtree.com.au/Home.mvc/Index) - Looks like some sort of job site done in ASP.NET MVC.
- AboutJasonJung.com (http://www.aboutjasonjung.com/) - Small personal blog site of Jason Jung
- MyTPI.com (http://mytpi.navin.biz/) - Site about golf health and fitness
- FlingMix.com (http://www.flingmix.com/) - FlingMix.com is a craigslist-like dating / adult personals site built using ASP.NET MVC. **WARNING!!! MIGHT NOT BE SAFE FOR WORK.**
- LizzabethBrown.com (http://www.lizzabethbrown.com/) - Real estate site.
- NewPerceptionsTech.com (http://www.newperceptionstech.com/) - New Perceptions Technology is a custom software solutions provider specializing in website development
- GetRocketShip.com (http://getrocketship.com/) - Hosted website CMS service for small businesses using MVC

If you have a site that you're developing using the ASP.NET MVC Framework, please let me know about it so I can include it here.

Here's a realestate site I developed using MVC preview 2, LINQ and jquery.

http://lizzabethbrown.com

My website http://newperceptionstech.com is also an MVC app, (not finished yet though, as of right now).

I've built an open source eCommerce site with MVC Framework:

http://sutekishop.co.uk/

Code is here:

http://code.google.com/p/sutekishop/

Also uses LINQ-to-SQL and the Castle Windsor IoC container.

You say you host your sites with daily razor but they say that they don't have iis7. How can you host it without iis7?

@ta4ka
You do not need IIS7 to host an ASP.NET MVC site.

My personal website www.klopfenstein.net was also built using MVC on IIS 6. I'm currently working in order to extend it to a complete CMS... In a couple of days www.gothicitalia.it will be published, running on the same setup.

I think you should add www.istanbul.com to the list as the portal is one of the first and biggest portals developed with asp.net mvc.

We used ASP.net MVC to generate a TV job site that you can access on Sky digital interactive TV, the good thing with minor adjustments we were able to produce views for Virgin Media and Looking Local platforms on Digital TV as well. It saved us many hours in development time, with each new platform we just generate a new set of views. The following url shows a video of how the MVC site on Sky interactive TV works (as of course cannot point to a TV site on web) This is for UK satellite viewers only.
